$75,000,000 Farm Bonds Are Planned

Washington, March 14—A new issue of farm loan bonds to the amount of approximately $75,000,000 will probably be offered for subscription in the next few days, treasury officials said tonight.

Issuance of new bonds, Commissioner Lobdell said at the time of the supreme court decision of February 28 upholding the legality of the federal farm loan act, would be made as soon as possible, but he intimated that it would be at least 30 days before the funds would be available for actual loaning.

"In the present money market the bond rate will have to be advanced to 5 per cent," Commissioner Lobdell said. "The interest rate to the borrowers will have to be correspondingly advanced to 6 per cent.

"The farm loan board is hopeful that the market may absorb farm loan bonds equal to the borrowing demands of the farmers of the country, but no one can predict, with safety the result of a financial operation of this magnitude."

Lumber is Down

Yes, Lumber Is Down—Down to where a farmer can afford to build anything that can be made of lumber even in the face of a low market on farm products.

Lumber Was The Last Great Commodity To Go Up and the first to come down. Today lumber prices are down to where it is hard to see how they can go any lower when costs are considered.

You Farmers Have Reason To Be Disappointed In the returns from last year's crops, but with lumber selling on the present basis we don't believe you can afford not to do whatever building or repairing may be necessary before Spring work commences.

Whether It's a Barn, or a Shed, or Just Some boards for fixing up around the place, the facts about lumber will appeal to any man or woman who believes in thrift and knows values.
